PROFILE

22 years old, currently pursuing a Bachelor of Science in Information Technology, in my fourth year at Ateneo De Naga University. I am adept at working both in a team and individually, and I am a quick and passionate learner.

Seeking an on-the-job-training opportunity in web or mobile development to apply and strengthen industry-relevant skills. Interested in collaborative work within a professional setting.

Highlighted Projects

WareSpace - Academic Group Project *2022*
(Made in Ruby on Rails and Vue.js | 3 Person Team, Back-end Developer and UI/UX Design)
- This web app aims to create a solution to the problems encountered by individuals who have vacant spaces and those in need of space. It provides hosts a way to market their properties by listing them in the application and for interested renters to easily see and access.

Severed Sword - Ateneo De Naga University Capstone Project *2023*
(Made in Unity and Firebase Realtime Database | 3 Person Team, Developer)
- This is an alternate reality game which aims to improve the Orientation Seminar experience of Freshman students in Ateneo De Naga University.

RD Pro (Relief Goods Distribution Management System Prototype) - Senior High School Research Project *2019*
(Made in .NET and Microsoft Excel | 5 Person Team, Solo Developer)
- This is a prototype for a relief goods management system to help barangays allocate, track and distribute their relief goods.
